## Default Diagram

Change Update Rate

Type in the number of seconds you would like between page updates and hit <RETURN>

10

### Some features to implement:

**Auto-detection:** Excel could automatically add a worksheet (a "tab" below) when it detects a new device on the network.

**Complex Aggregation:** Because it is Excel, you can do anything you want, easily.

**Logging:** You could write simple scripts to log the values on the left to an Access DE

**Animation:** Charts, warnings, etc

**Onboard logs** could be displayed easily

**Default diagrams:** we just need to create an excel template for each device

Sum of Currents:

643.31

Formula-based Setpoint:

OVER 550 Volts

## GRAPHICAL VOLTAGES
